

PreFlite™

Aircraft Security System

Securaplane PreFlite™ Aircraft Electronic Security System

Reliable intrusion monitoring for your unattended aircraft from the world leader in Aircraft Intrusion Detection and Security Systems.

PreFlite offers worldwide connection with your aircraft security system via GSM mobile network from any phone. No need to carry a dedicated transceiver – arm, disarm and check status from any phone.

Advantages:

- Operates worldwide via GSM mobile network
- Alerts via voice and/or text messaging
- Control and monitor from any telephone, anywhere.
- PreFlite detects, logs and reports any and all intrusions.
- Send alerts to multiple users or escalate the alert notifications.

Innovative New RCR-01 Wheelwell Sensors

Securaplane's RCR sensors use patented micro-impulse radar technology to detect wheelwell intrusions.

- Easy installation and set-up.
- No calibration or special tooling required.
- No worry about false alarms from misaligned sensors.

Upgrade Your Existing System to PreFlite

Contact Securaplane to find out how simple it can be to upgrade your current security system to PreFlite. In most cases, PreFlite installs using the existing security system installation provisions with minimum effort.

Video Camera Options

Options:

Cameras

Purpose-designed camera units interface to PreFlite and provide a video record of the intrusion via the Securaplane DVR-01 Digital Video Recorder. In addition to the security function, camera systems can assist with situational awareness such as ground taxi and landing gear monitoring, cabin safety, and may also be used to provide in-flight entertainment to the passengers.

Auxiliary Battery:

BP-1224 Auxiliary Battery Pack increases system run time - recommended for systems with video cameras installed.

Solar Panel:

SP-02 Solar panel maintains battery life.

Securaplane has over 1100 security systems installed in all types of aircraft, ranging from small turbo prop aircraft to large business jets. Securaplane's system is the most recommended security system by OEMs, aircraft operators, and service centers worldwide.
