Duncan Aviation and CRS Jet Spares
to sell and service its emergency batteries**

Securaplane Technologies signed new distribution agreements with CRS Jet Spares and with Duncan Aviation for emergency battery sales and battery reblocking service. This new battery team will provide owners and operators increased availability and access to emergency battery support.

Securaplane offers a full line of sealed lead acid emergency battery systems that have been installed on Boeing, Cessna, Dassault, Gulfstream, Bombardier, and Raytheon aircraft. Securaplane's emergency battery systems feature field proven sealed lead acid batteries, battery level test, and a built-in precision charging system. There is no need to deep cycle or remove the battery from the aircraft for a capacity check which reduces battery maintenance. These features combined with low cost battery replacement translate to greater reliability and lower maintenance expenditures.

Duncan Aviation is an aircraft service provider with 1,800 employees supporting the aviation needs of government and business operators and other service providers. These services include airframe, engine, avionics installations, interior and paint completions/modifications, avionics/instrument and accessory/propeller repair/overhaul and parts support. Complete service facilities are located in Lincoln, Neb., and Battle Creek, Mich. Additional locations include 21 satellite avionics facilities located throughout the United States, a line service/regional support operation in Kalamazoo, Mich., and Lincoln-based Parts Support Services, a division that sells and consigns general aviation parts to aircraft operators and service organizations worldwide.

CRS Jet Spares is a premier aftermarket support facility in the Business Jet Community. Supplying total solutions to operators around the world through exchanges, sales, provisioning packages, repair or rental options, CRS Jet Spares has a program to meet all requirements. CRS supports Learjets, Hawkers, Gulfstreams, Challengers and Falcon's through a comprehensive inventory coupled with years of experience. CRS provides services which conform to ASA-100 and AS9120 Quality standards. Offering quality, competitive pricing and renowned customer service, CRS is available 24/7/365 to keep your business jet up and flying.
