Email: kiersten@securaplane.com**Securaplane expands its product support services into Europe**

Securaplane Technologies is adding two repair/stocking facilities, one in the United Kingdom and one in Germany. These facilities, part of Securaplane's sister company, Pacific Scientific Aviation Services, will support Securaplane's main ship batteries, emergency batteries, and security and camera products. Europe support services are targeted to begin in January 2007. The initial support services will include AOG and spares support, with further service capabilities to be added in the near future.

Securaplane's support services through Pacific Scientific Aviation Services Company will provide rotatable exchange services rapid turn repair, overhaul, and spares support services for operators of Securaplane equipment, other Pacific Scientific Aerospace Group products, and other safety related equipment. Factory Authorizations assure complete OEM parts support and immediate, current technical data support. Spares management, stock management and worldwide logistics support services are tailored to suit specific customer needs.
