**The EnerSys/Hawker 43Ah “pure lead” main ship battery is now STC’d
for installation on Boeing 747 (-100/-200/-300/SP)**

On March 28, 2007, the Hawker 43Ah steel case, sealed lead-acid battery was STC’d for installation into the Boeing 747 (-100/-200/-300/SP aircraft.

The 43Ah battery installation was developed as a fit, form and functional replacement for existing SAFT 40678-4 and 40678-7 on 747 (-100/-200/-300/SP). This same battery is also used on the Boeing 737-100/-200/-300 series aircraft. Securaplane Technologies is the Master Distributor and Design and Certification Authority for the EnerSys / Hawker brand batteries for commercial and business aviation in the US.

EnerSys’ line of Hawker Main Ship batteries offer significant performance enhancements compared to other sealed lead acid and Ni-Cad batteries. Benefits include:

- 99.99% pure lead construction for enhanced life and performance.
- A 30-month full replacement warranty on batteries after installation, and 24 months storage prior to installation is standard for Securaplane/Hawker Main Ship Batteries.
- Batteries are shipped fully charged and ready to install.
- True no-maintenance battery.
- Hot and cold performance far exceeding that of any other aviation battery.
- Unsurpassed cranking power.
- Battery monobloc replacement at significantly less than the list price of a new battery.
- Certified as non-spillable and may be shipped as non-hazardous material via ground or air.

Securaplane has supplied quality products to the aviation industry since the mid-80s. Securaplane has designed, developed and certified various batteries and charging systems for many aircraft including these recent certifications: ATR 42/72 Series, Dash-8, Caravan 208, G-II, G-III, G-IV, Challenger 600/601, CRJ 100/200/700/900 and Citation 500/501/550/560 Series, King Air 90, 100, 200 and 300 Series, Beechjet 400 Series, Hawker 400, 600, 700, 800 and the Falcon 2000/2000EX.

Note: The Hawker battery brand is not affiliated with Raytheon Aircraft Company’s line of Hawker aircraft.

About Securaplane

Securaplane Technologies Inc. is a leading supplier of avionics products for commercial, military and business aircraft including Airborne Video and Security Systems, Emergency/Main Ship Batteries, Battery Chargers and Inverters, and Wireless Technologies, including smoke detection/suppression systems. Securaplane is the design authority for the Hawker line of Main Ship Batteries by EnerSys.

Securaplane is a wholly owned subsidiary of the Danaher Corporation, and is part of the Pacific Scientific Aerospace and Defense Group. (NYSE: DHR). More information can be found at Securaplane’s web site, www.securaplane.com and on EnerSys’ website, www.enersys.com.
